

AHMAD SYAHMI AZHAR

Software Developer

Hey there, I'm Syahmi, a software developer eager to make a mark in web development. While I'm currently honing my skills in this area, I'm also curious about related fields and looking forward to expanding my expertise in software engineering.

Employment History

SOFTWARE DEVELOPER at BOSS BOLEH SDN BHD, Kuala Lumpur

OCTOBER 2023 – PRESENT

Developing new software features with a focus on automation to enhance efficiency. Handling API migrations to ensure seamless transitions, troubleshooting production issues promptly to minimize downtime, mentoring juniors and interns, and conducting comprehensive code reviews to uphold high standards in software development.

SOFTWARE DEVELOPER at TYRELL SYSTEM SDN BHD, Kuala Lumpur

JUNE 2021 – JULY 2023

Managing requests and development tickets from the main branch in Japan, ensuring timely resolution with meticulous attention to detail. Collaborating closely with the team to contribute to content development and select solutions that uphold and enhance websites. Responsibilities extend to both back-end and front-end development, focusing on optimizing user experiences through robust API integration and clean, error-free code. Deliverables align closely with project scopes, aiming to minimize performance issues and maintain seamless functionality across platforms.

JUNIOR WEB DEVELOPER at SMART TECH TANK SDN BHD, Shah Alam, Selangor

SEPTEMBER 2020 – MAY 2021

Developing the Sistem Smart Inisiatif Peduli Rakyat (SSIPR) for the Selangor state government, a comprehensive platform for administrators and users. Utilizing PHP and Python for backend data integration and storage, and the Laravel framework with HTML, CSS, and JavaScript for a user-friendly frontend interface. Automating data harmonization and cleaning with Python before storing data in Elasticsearch for advanced statistical visualizations. This project aims to enhance data analytics for administrators and improve overall user interaction with the system.
